Having Finish problems?

Finish not drying?

When using oil based products we recommend that you use absco sealer available in quart containers. This is the old 550 voc formula. Use this first to seal the floor... It will dry quickly and allow the new 350 voc finish to flow and coat more easily. Still not drying fast enough use two coats of sealer and then one coat of 350 voc finish. The 350 finish is thicker than old formula finishes and will give similar protection if applied this way.

Grand Clear Wood Floor Finish (Water Based/Oil)

Still not drying fast enough... Use water based products! We recommend Grand finish as a great alternative to oil. It is part oil with waterbased thinners. It flows more like oil and dries like water. While still giving a rich oil color to the wood.
